It Is An Undocumented Google  
Search Operator.

• • •

## Why Use AROUND()?

*This is very Useful When we are looking For Combination Of Search Terms containing Two or more search keywords when one is more dominating than the other but we are interested in relationship between the search query items*

# How To Use It?

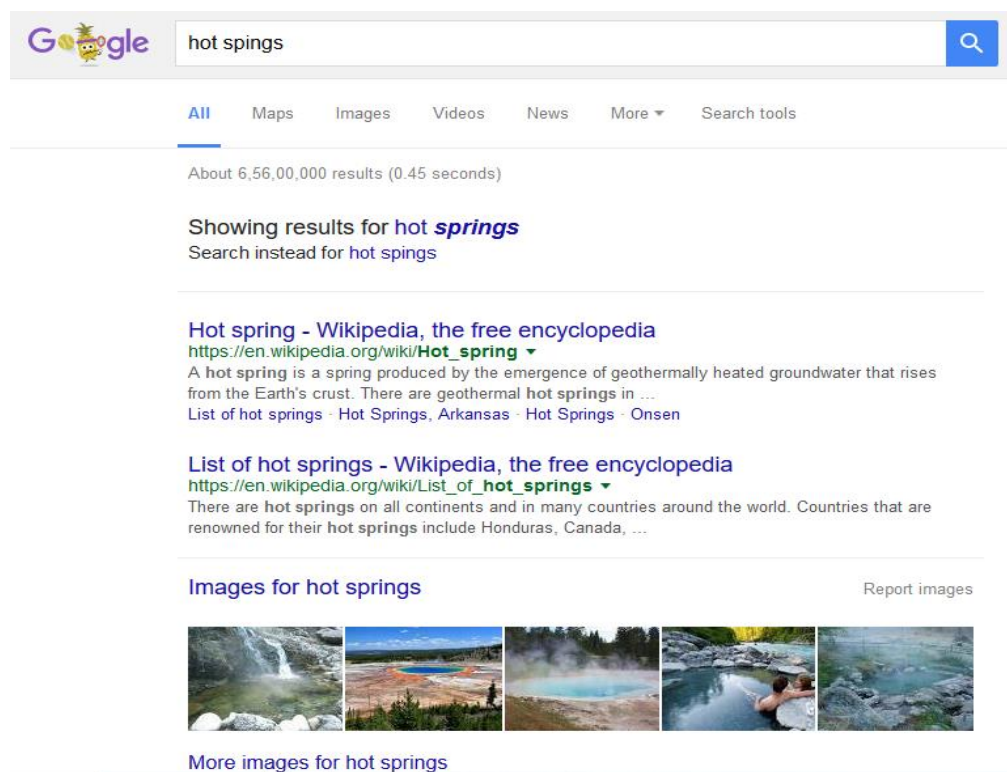

*This AROUND(N) is a undocumented Google search operator which is written in uppercase with a an Integer Input.*

*It will help you search document where the distance between two searched items is "N"*

*The Higher The Number N the Less is the proximity between the two or more searched word.*

## Examples

A Research Query Saya that the Search “Hot Springs” will mostly show search related to the geographical hot springs because these two words are maximized in use together than in separation

The screenshot shows a Google search interface with the query 'hot springs'. The search results page displays 'About 6,56,00,000 results (0.45 seconds)'. It highlights a suggestion to search for 'hot springs' instead of 'hot spings'. The first result is a Wikipedia entry for 'Hot spring', followed by a link to a 'List of hot springs' on Wikipedia. Below the text results, there is a section titled 'Images for hot springs' with a grid of five images showing various hot springs and geothermal features. A 'Report images' link is visible to the right of the image grid.

Now use the AROUND(N) search operator between hot and spring here the result will contain those pages also which will have spring and hot in the close proximity if we use lower values of n and if we use the higher values of n then it will be in far proximities.

The screenshot shows a Google search interface with the query "hot AROUND(5) springs" entered in the search bar. The search results are displayed on the left, and there are two sidebars on the right. The first sidebar contains a sponsored advertisement for a Kenstar 15 Ltrs Hot Spring Kgs15w5m-gde Storage Geyser Ivory, priced at ₹ 5,518.00. The second sidebar contains a definition of a hot spring from Wikipedia. The main search results on the left include links to "Top 5 Unique Hot Springs Destinations in India - Indiamarks", "Hot water springs in India | Latest Travel Blogs & Articles at Travel ...", "Hot spring - Wikipedia, the free encyclopedia", and "List of hot springs - Wikipedia, the free encyclopedia".
